Screens and navigation

Home Screen

- Displays the *Fruit-lens* logo and two buttons:
 - "Tap to start scanning" → Navigates to the *Scanning Screen*.
 - "Use image from gallery" → Navigates to the *Gallery Screen*.

Scanning Screen

- Contains a "Go back" button to return to the *Home Screen*.
- Starts scanning the fruit.
- After scanning, it redirects to one of the following result screens based on the detected fruit:
 - Apple Results Screen
 - Banana Results Screen
 - Orange Results Screen
 - Error Results Screen, if the fruit is not recognized.

Gallery Screen

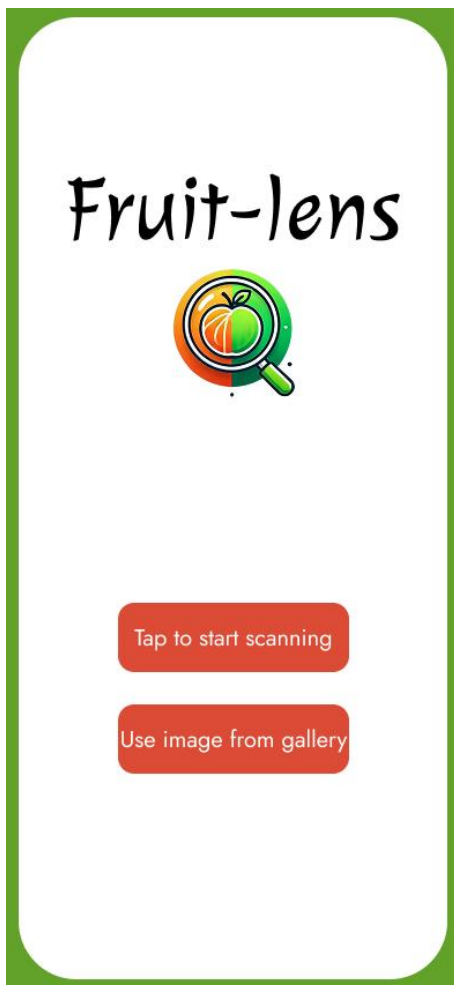

- Allows users to select previously analyzed fruit images.
- Each image redirects to its corresponding result screen:
 - Apple image → *Apple Results Screen*.
 - Banana image → *Banana Results Screen*.
 - Orange image → *Orange Results Screen*.

Fruit Results Screens (Apple/Banana/Orange)

- Displays the identified fruit image.
- Shows its ripeness status (*Unripe*, *Ripe*, *Rotten*).
- Provides a list of recommended recipes using that fruit.
- Includes a "Go back" button to return to the previous screen.

Error Results Screen

- Appears when the fruit cannot be recognized.
- Displays an error message and a "Go back" button to return.

 Go back

Apple

State: Unripe/Ripe/Rotten

Time left: _ days

Recipes:

- Apple pie
- Apple slices
- Apple juice
